LF Antitrust policy notice

- › Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.
- › Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

Topics

1. Current issue status
2. Documentation migration status
3. Kramdown vulnerability
4. Next meeting

Current issue status

Repo	open-horizon.github.io
New Issues	3
Backlog	0
In Progress	4
Completed	22

Documentation migration status

Issues:

- › Critical – perform all reviews before publishing – **ongoing**
Content review, Functional review (links, markup validation), Technical Review (is it correct, complete)
 - › **DECISION: Merge issue-40 branch and then review in integrated state, or in current branch?**
- › Ongoing - maintain list of missing items to address at a later point, should open as GitHub issues
[Issue 53](#): Enhance HTML page with MD template – Pratyush Raj
[Issue 54](#): Enhance Swagger JSON files with JS template – Shubhank Saxena
~~TBD: Identify pages with images that will need to be updated – where to store list of all site pages?~~
 - › **HTML page in the root with links to all of the migrated documentation pages**
<http://127.0.0.1:4000/dir.html>
- › Not MVP - Plan for images (SVGs) – **NOTE: successfully edited existing SVG as-is**
Investigate markup-based image generation, w/support for variable interpolation
- › Not MVP - process to crawl files, seed list. Confirm no orphan pages, no bad links, valid markup

kramdown

Open

GitHub opened this alert 8 days ago

Generating an automated security update

started now by [dependabot](#)

1 kramdown vulnerability found in **Gemfile.lock** 8 days ago

Remediation

Upgrade **kramdown** to version **2.3.1** or later. For example:

```
gem "kramdown", ">= 2.3.1"
```

Always verify the validity and compatibility of suggestions with your codebase.

Details

CVE-2021-28834

high severity

Vulnerable versions: `>= 1.16.0, < 2.3.1`

Patched version: `2.3.1`

Kramdown before 2.3.1 does not restrict Rouge formatters to the Rouge::Formatters namespace, and thus arbitrary classes can be instantiated.

Up Next ...

- › Researching markup-based diagrams
- › Learning path docs to follow on to Quick Start and enhance Getting Started
- › How do we keep the documentation updated whenever new features are added? – cover in feature design review and enforce when merging
- › Should each WG be responsible for linking from documentation to in-repo MD and vice-versa? – person maintaining the MD
- › Working with DevOps SREs to automate validation checks
- › ???

Next Meeting

Next Meeting

- › Next Meeting: Tuesday, April 20 @ 6am PT/9am ET

Thank You

 THE **LINUX** FOUNDATION
