Follow-up: GHA reporting broken links

- [Issue 122](#) opened automatically
 - found 22 broken links
 - Both external and internal, and dependencies
- Joe remediated, opened [PR #123](#)
 - The 22 broken links were in 14 files
 - Two files required amputation
 - docs/admin/monitoring.md (90% removed)
 - docs/hub/post_install.md (85% removed)
 - PR now needs review
- Unknown if GHA will find 22 more after this, or if incremental
- Preliminary conclusion ... despite hunting for broken links list, GHA a keeper

Follow-up: Docs Copy GHA needs work

- › See [github workflows](#)
- › `anaxdocs-copy.yml` GHA should copy `anax docs` folder from `anax` repo when a PR is merged. Instead, it is copying within the `docs` repo when a PR is merged.
- › Will this work across repos?
- › Should it live in `anax` repo or can it work from `docs` repo?
- › Joe will file an issue to remediate.
