Hello TSC voting members,

As part of receiving a contribution of a north plugin for Fledge for the time series database I would like to propose that we add Carl Albright of Casne, who are making that contribution, as a committer to the fledge-north-timeseries repository. It requires a majority TSC vote to permit the addition of a new committer to a fledge-iot repository.

Please respond with Yes, No or abstain to the email to signify your willingness to add Carl to the committer list. Carl's GitHub ID is cargabright

Thanks

Mark Riddoch
