## LF Antitrust Policy Notice

Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.

Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrave of the firm of Gesmer Updegrave LLP, which provides legal counsel to the Linux Foundation.

# FYI: linuxfoundation added as GitHub owner

- › This is just an FYI.
- › Required since they are legal owner.
- › We forgot to do this earlier.
- › They will not be doing anything with the code.

## Followup: Feature Request Lifecycle in late ideation phase

- › Present to the TSC for final feedback
- › Please read the pages and add comments at the bottom.
- › We have five feature ideas we're seeding.

## Followup: Security Items

- › Pending: Create email address for reporting security issues
  - › WG Chairs will be subscribed
- › SIR team is WG Chairs for now
- › Please check all Dockerfiles and images they create!
  - › Checked [web-helloworld-python](#) (not picking on them)
  - › Filed [issue #5](#) based on docker scan results.

## Discussion: GitHub Actions

- › I created (cut-and-paste) a GHA to generate & update CONTRIBUTORS.md in a single repo as a test.
- › See thread in [#open-horizon-devops](#)
- › Ben Courliss: “In general I don't think the DevOps WG should own all GitHub Actions. The DevOps WG can be a source of information and knowledge on how to create them, but I feel it should be up to each repo to own their own actions, especially when it comes to building their code.” An exception to this would be Actions that apply to all repos.
