

Open Horizon

 LF EDGE

Joe Pearson

Chair, Open Horizon TSC & Documentation WG

TAC Member, LF Edge

Technology Strategist, IBM (Networking & Edge Computing CTO group)

 THE **LINUX** FOUNDATION

Today's Agenda

1. Welcome Open Horizon's 3rd Mentorship Cohort and Introductions
2. Schedule and Housekeeping
 - A. Schedule, Evaluations, Mentors
 - B. Communication and tools
 - C. Meetings
 - D. Mentorship projects and goals
3. LF Edge and Open Horizon
4. Project code and non-project code
5. Q & A

Introductions

Open Horizon's Third Mentorship Cohort

LFX Mentorship

Mentors

- Jon McGuire (mcgj)

Mentees

- Anushree Sabnis
- Unnati Chhabra

IBM JumpStart

Mentors

- Joe Pearson (joe)
- ???

Mentees

- Ben Zimmerman
- Eli Latocki
- Marhababanu Chariwala
- Vineeth Vijayan

RPI – RCOS

Mentors

- Glen Darling (mosquito)
- Joe Pearson (joe)

Mentees

- TBD

Spring 2021 Term Graduates

Debabrata Mandal (Deb)

Mustafa Altekreeti

Megha Varshney

Quang Hiệp Mai (Mike)

Fall 2020 Term Graduates

Clement Ng

Anukriti Jain

Edidiong Etuk (Eddie)

Han Gao

Housekeeping

LFX Mentorship Schedule and Milestones

- › September 1 – Fall 2021 Term begins
- › Week 3, September 22
 - › Mentors conduct first evaluation
- › Week 9, November 3
 - › Mentors conduct second and final evaluation
- › Week 12, November 30
 - › Mentorship officially concludes
- › Week 13, December
 - › Project issues digital certificate of completion
 - › Project marks mentees as graduated

Communications and Tools

- › LF Edge provides:
 - › Matrix chat server (use Element chat client or similar)
 - › Groups.io mailing list and calendar
 - › Paid Zoom videoconferencing for calls, meetings, and webinars
 - › Confluence Wiki for the project
 - › Edge Computing Lab for scheduled testing on physical devices
 - › CD/CD and DevOps tools and infrastructure and accounts
 - › Marketing and social media support and accounts
- › All else is up to us

Meetings and Goals

- › You'll meet personally with your mentor at the agreed-to cadence
 - › Each is different
- › You'll want to attend your Working Group (or SIG) meetings and participate there and in the relevant chat rooms
 - › You may also need to attend other relevant WG meetings if applicable
- › Your mentor will communicate your goals for this term
 - › You may publish them [on the wiki](#)
 - › The goals are aspirational and might not be completed within the term

LF Edge and Open Horizon

Introduction to Open Horizon (stage two LF Edge project)

Open Horizon is an application and metadata delivery and management platform.

It provides

an intent-based policy mechanism to securely and autonomously deliver containerized workloads to edge compute nodes of varying sizes and capabilities and in various connected states.

It allows workload and ML model management across fleets at hyperscale, from a single Linux device or Kubernetes cluster to deployments of 30,000 nodes or greater, without requiring on-premises administration.

Open Horizon helps Enterprises reduce costs by providing remote and autonomous application lifecycle management.

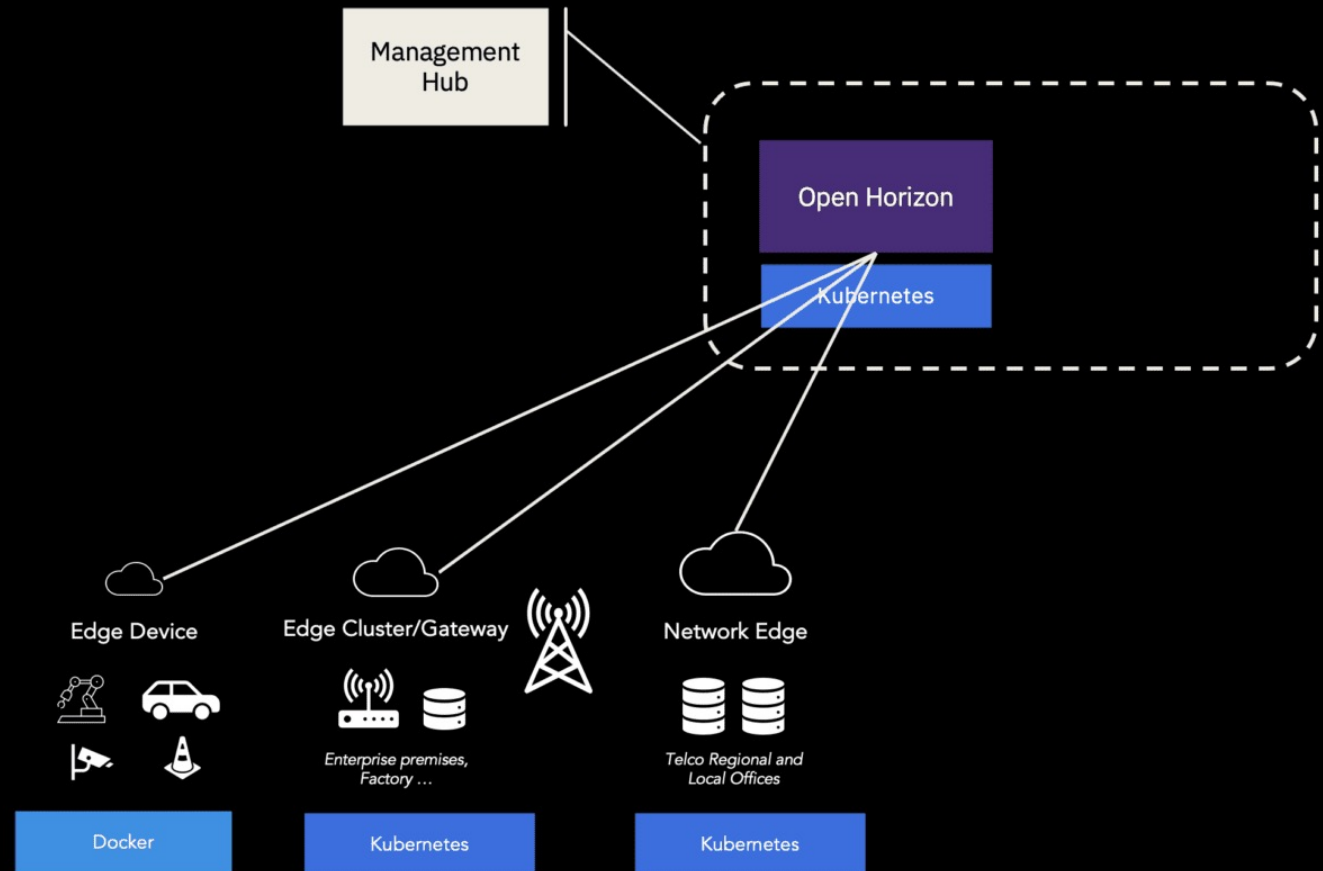

Open Horizon consists of:

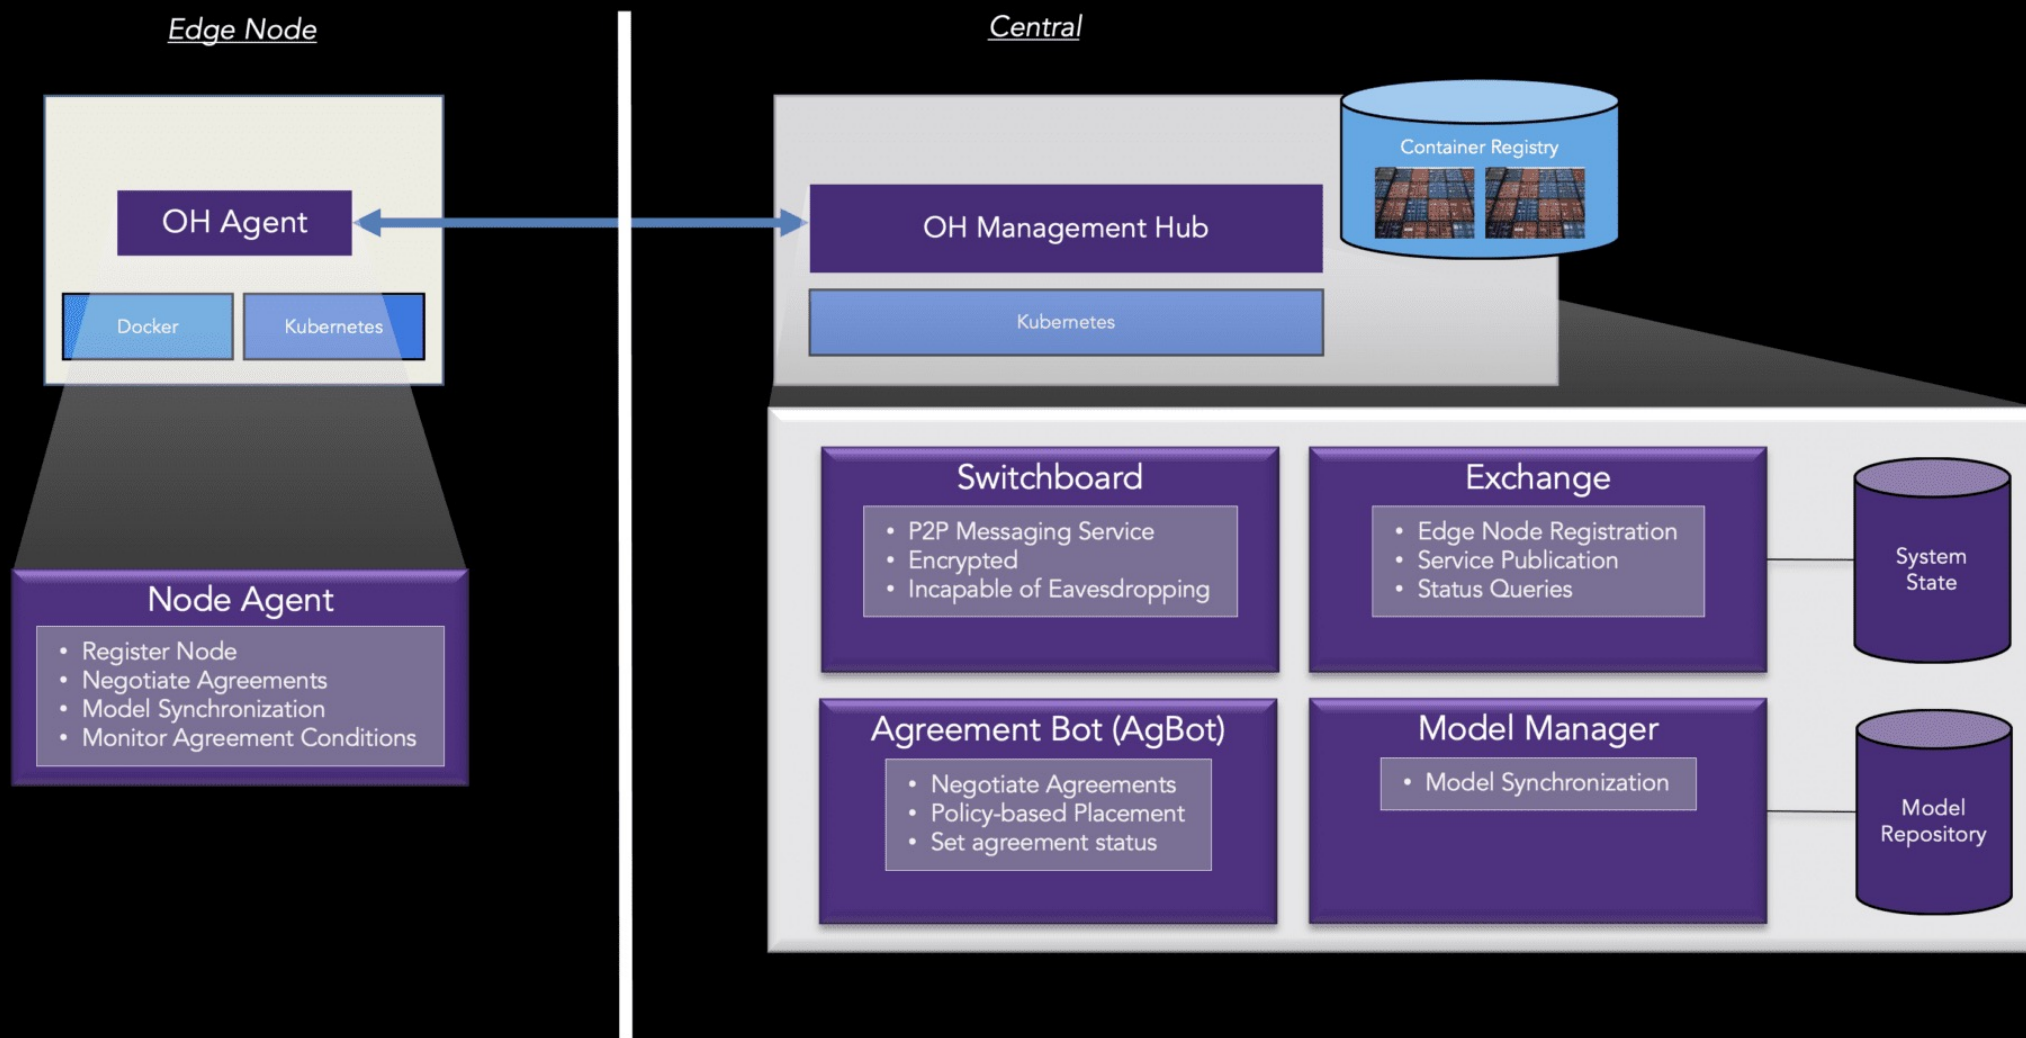

- **Management Hub:** where administrative operations are centralized
- **Edge Device Agent:** combined with container runtime
- **Edge Cluster Agent:** combined with OCP Kube platform

For managing the Edge

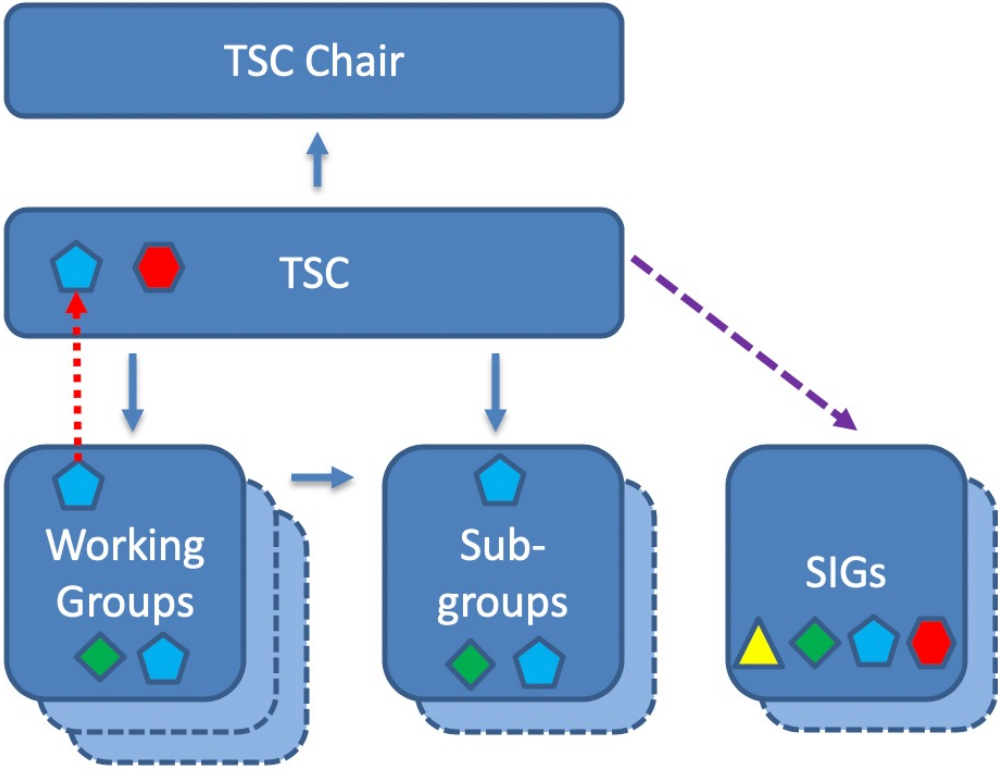

The Main Open Horizon Components

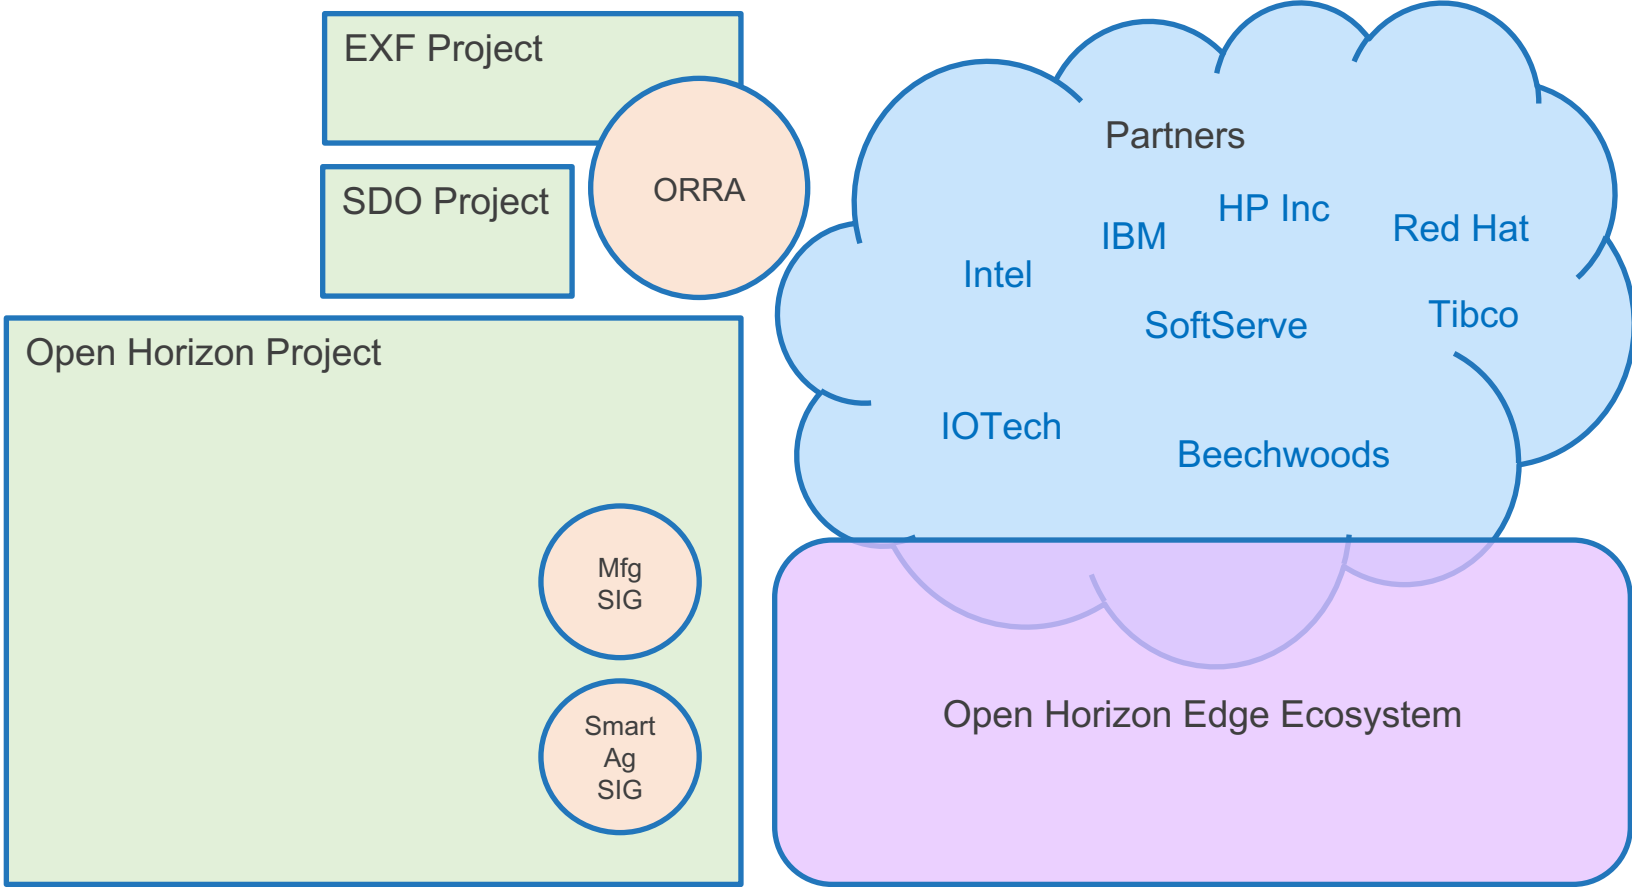

Project Organization Structure
