(WG) Working Groups

Per the Community Membership page, Working Groups are:

Small groups of Contributors, ideally led by a Maintainer, that meet to develop items in the project roadmap resulting in releases and documentation updates. Working Groups are for relatively permanent features and functionality, while Sub-groups are for ephemeral or transitory work (such as an integration effort) with a defined or limited lifespan.

The current Working Groups are:

- Agent - David Booz
- Developer Examples - Troy Fine
- DevOps - Ben Courliis and Carl Girouard
- Documentation - Joe Pearson
- Management Hub - Bruce Potter
- Outreach (Marketing, Communications, Events, Partnerships) - Susan Bowlin
- QA & Testing - Jon McGuire
