What are you working on	Want to share with the group what you are working on? add it here 1) NA

Attendees

- Aaron Williams
- Avi Deitcher
- Erik Nordmark
- Gopi
- Srinibas
-

Action items

- [x] need to get people on GitHub, so that they can do code reviews- need to be able to assign code review to people, then PR are approved Erik and Roman
- [x] ethernet and LTE support if ethernet fails it will roll over to LTE
- [x] need some documentation around the networking parts- especially around fail over
- [x] board meeting updates- LF Edge TAC vs. TSC- Tac has been more worried about bringing in new projects. should they now look at the over all Arch- namely API's and their naming conventions. 3. more end to end demos. Show all of the projects working together. Example- Fledge-EVE-EdgeX- this will lead to a better story of everything working together.
- [x] Mini summit in late Oct in Europe might not happen because of lack of LF Edge people attending
- [x] - people use different terms- need to clean up the Glossary- new term has popped up is Deep Edge, it is closer to the radio but still on the operator side.
- [x] look at the calendars- and see what is going on....
    - seems that the meeting was passed around and the calendar was not subscribed to.
- [x] USB stick that has the 3.9 EVE is having issues. Static IP address is not coming through.... 3.9.2 the testing doesn't see a problem but the US group is seeing issues, need to figure the differences.
- [x] Avi- added in the controller to a propose. it is part of the wiki... How do you change the controller? what are the use cases for this? this has been added as formal proposal...
