TSC Email Votes

5th August 2022

Proposal

We have another new member of staff at nerdAppLabs in India who will be working with Dianomic on updates to Fledge. I would like to propose we add Himanshu Vimal to the fledge-iot GitHub repository contributor list. His GitHub ID is cyberwalk3r. Following the rules of the project we need a majority TSC vote to enable this.

Proposed: Mark Riddoch

Seconded: Tom Arthur

19th July 2022

Proposal

Our current DevOps person within the project has moved on to advance his education and we now have a new DevOps person that will start working with the project this week., Mohit Tomer. In order for him to do this we need to get him access to the Fledge repositories. I would therefore like to propose a we grant Mohit's GitHub identify, Mohit04tomar, the same level of access of the previous incumbent, Yash Tatkondawar. Following the rules of the project we need a majority TSC vote to enable this.

21st September 2021

Proposal

Add three new voting members to the Fledge TSC. The candidates are;

- Robert Raesemann - Rob is an independent contractor with many years experience working with industrial historians and was an early adopter of Fledge. He was contributed a number of plugins to Fledge and is responsible for a number of Fledge installations in production use.
- Mike Styer - Mike works for Google and has been instrumental in the Google contributions to Fledge. He has worked with us to spread knowledge regarding Fledge both within Google and to partners of Google. Mike has also been heavily involved in the adoption of machine learning techniques with Fledge, based on the TensorFlow platform.
- Benoit Jeanson - Benoit works for RTE and is instrumental in the FledgePower project which is run under the umbrella of the Linux Foundation Energy group. RTE and FledgePower have contributed plugins to Fledge and also worked with us on the Fledge roadmap.

As we are likely to be loosing three existing members the proposal is to vote unblock to add these new members
