Your SSH key that you provide to the Akraino dashboard will be copied to the root user of the machine. Authenticating as the root user is recommended.

IPMI Access

When your booking completes, the dashboard will provide IPMI credentials to you.

You can access an IPMI interface like the example below:

intel1-ipmi.akr.iol.unh.edu

Then enter the username and password from the file provided to you and now you can manage the system and will even be able to add your own public keys in the event of a reinstall of the machine.

If you have any issues with any of the IPMI interfaces please email akraino-lab@iol.unh.edu and we will assist you in anyway we can.
