

# Sandbox to Test This Wiki

- [Questions:](#)
  - Task report
- [Useful Wiki Features](#)

## Questions:

- ✓ Can we apply different ACLs to different pages/folders?
  - Yes, they are called **Restrictions** and you can access that from the ... in the upper right of a page.
  - Joe, Dave, and Bruce currently have authority to change Restrictions for open-horizon pages. Contact [Kendall Perez](#) to get that authority.
- ✓ How to create an action item list? Is it a Task Report? Nope, that's this widget shown below.

### Task report

Looking good, no incomplete tasks.

Instead, click the "Task list" icon, "at" mention someone, type the task as plain text, then "/" to add a due date.

Bruce Potter to finish his task 02 Jul 2021  
David Booz to follow up with Bruce 05 Jul 2021

- ✓ How to comment on pages?
  - You can comment at the bottom of each page (and resolve comments), **only** if you are logged in.

You can add an inline comments using the **Info** menu item under the + drop-down

## Useful Wiki Features

- It is based on [Confluence](#), so has all of those capabilities
- Action items
- User mentions
- Page templates
- You can watch pages (be notified of changes)
- You can add a description of a change
- You can see the change history and revert to any previous page
- **Multiple persons** can edit a page at the same time!
- You can indicate status of an item using the Status menu item under the + drop-down: BLOCKED
- The table of contents was generated automatically using the **Table of Contents** menu item under the + drop-down
- Can change the page layout to 2 or 3 columns
- Can insert tables:

- There are a bunch of other things you can insert using the **Other macros** menu item under the + drop-down:

✓ Helpful tips

Code blocks:

```
if [[ $name == 'bp' ]]; then
    echo 'hi'
fi
```

With  
several  
paragraphs

Even a roadmap:
