Meeting Agenda - 2022-06-21

Meeting Agenda for 21 Jun 2022

Antitrust Disclaimer

Attendance

Attendance is taken purely upon #info in Zoom Chat

Attendee	Company/Org
Ben Courliss	IBM

Agenda Items	Presented By	Presos/Notes/Links/
Welcome	Ben Courliss	
Core Infrastructure Badge	Joe Pearson	Working session to review the Badge Application: https://bestpractices.coreinfrastructure.org/en/projects/4300
Q/A and Wrap up	Anyone	

Meeting Notes

- Look into what the EdgeX Foundry does for their release notes. There may be a GitHub Action available to reuse.
- Need to address security vulnerabilities.
  - Maybe have a wiki page to start with - Akraino and EdgeX Foundry wikis may have something we can base off of
    - https://github.com/lf-edge/edge-home-orchestration-go/blob/master/.github/SECURITY.md
  - Have TSC members (WG chairs) on private email list where users can submit vulnerabilities
    - Speak with Kendall who may have started to create this list via groups.io
  - Potentially look at using Syft to output a CycloneDX or SPDX file that can be joined with a CVE database to produce a vulnerability report from images

- - https://security.googleblog.com/2022/06/sbom-in-action-finding-vulnerabilities.html
  - TESTING.md to address testing policy for new functionality (required unit tests, etc)

Open Action Items

- [ ] Build process discussion for OpenHorizon Artifacts. Need holistic view of process documented and issues created in order to make progress.
- [x] Ben Courliss Investigate Anax changelog script - https://github.com/open-horizon/horizon-deb-packager/blob/master/Makefile#L56
- [ ] Ben Courliss Create some issues around implementing versioning and changelogs
