

Meeting Agenda - 2022-09-27

Meeting Agenda for 27 Sep 2022

Antitrust Disclaimer

LF Antitrust policy notice

- › Linux Foundation meetings involve participation by industry competitors, and it is the intention of the Linux Foundation to conduct all of its activities in accordance with applicable antitrust and competition laws. It is therefore extremely important that attendees adhere to meeting agendas, and be aware of, and not participate in, any activities that are prohibited under applicable US state, federal or foreign antitrust and competition laws.
- › Examples of types of actions that are prohibited at Linux Foundation meetings and in connection with Linux Foundation activities are described in the Linux Foundation Antitrust Policy available at <http://www.linuxfoundation.org/antitrust-policy>. If you have questions about these matters, please contact your company counsel, or if you are a member of the Linux Foundation, feel free to contact Andrew Updegrove of the firm of Gesmer Updegrove LLP, which provides legal counsel to the Linux Foundation.

THE LINUX FOUNDATION

LF EDGE

Attendance

Attendance is taken purely upon #info in Zoom Chat

Attendee	Company/Org
Ben Courliss	IBM

Agenda Items	Presented By	Presos/Notes/Links/
Welcome	Ben Courliss	
Review Issue 126 and Issue 127	Ben Courliss	
Review new security vulnerability scanning	Ben Courliss	
Q/A and Wrap up	Anyone	

Meeting Notes

- Should we create Github Issues for Mend-scan reported vulnerabilities?
 - Good discussion on recording.

Open Action Items

- ☐ Build process discussion for OpenHorizon Artifacts. Need holistic view of process documented and issues created in order to make progress.

- ☒ Ben Courliss Investigate Anax changelog script - <https://github.com/open-horizon/horizon-deb-packager/blob/master/Makefile#L56>
- ☐ Ben Courliss Create some issues around implementing VERSIONING and CHANGELOGS
- ☐ Ben Courliss Create issues for release notes Look into what the EdgeX Foundry does for their release notes. There may be a GitHub Action available to reuse.
- ☐ Define plan on how to address security vulnerabilities.
 - Maybe have a wiki page to start with - Akraino and EdgeX Foundry wikis may have something we can base off of
 - <https://github.com/lf-edge/edge-home-orchestration-go/blob/master/.github/SECURITY.md>
 - Have TSC members (WG chairs) on private email list where users can submit vulnerabilities
 - Speak with Kendall who may have started to create this list via groups.io
 - Potentially look at using Syft to output a CycloneDX or SPDX file that can be joined with a CVE database to produce a vulnerability report from images
 - <https://security.googleblog.com/2022/06/sbom-in-action-finding-vulnerabilities.html>
- ☐ TESTING.md to address testing policy for new functionality (required unit tests, etc)
- ☐
