

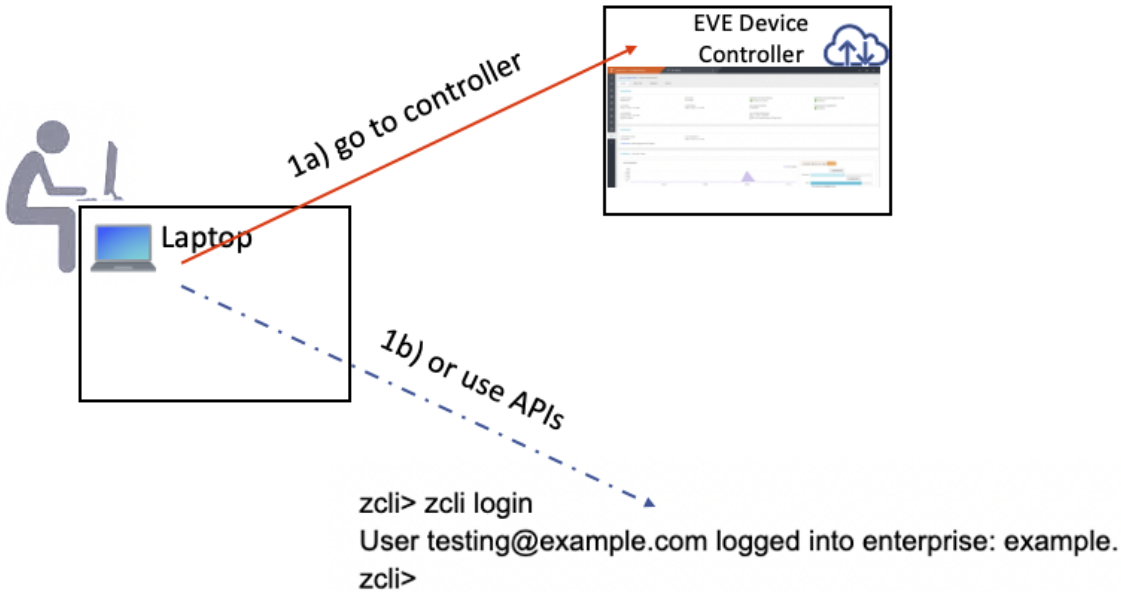

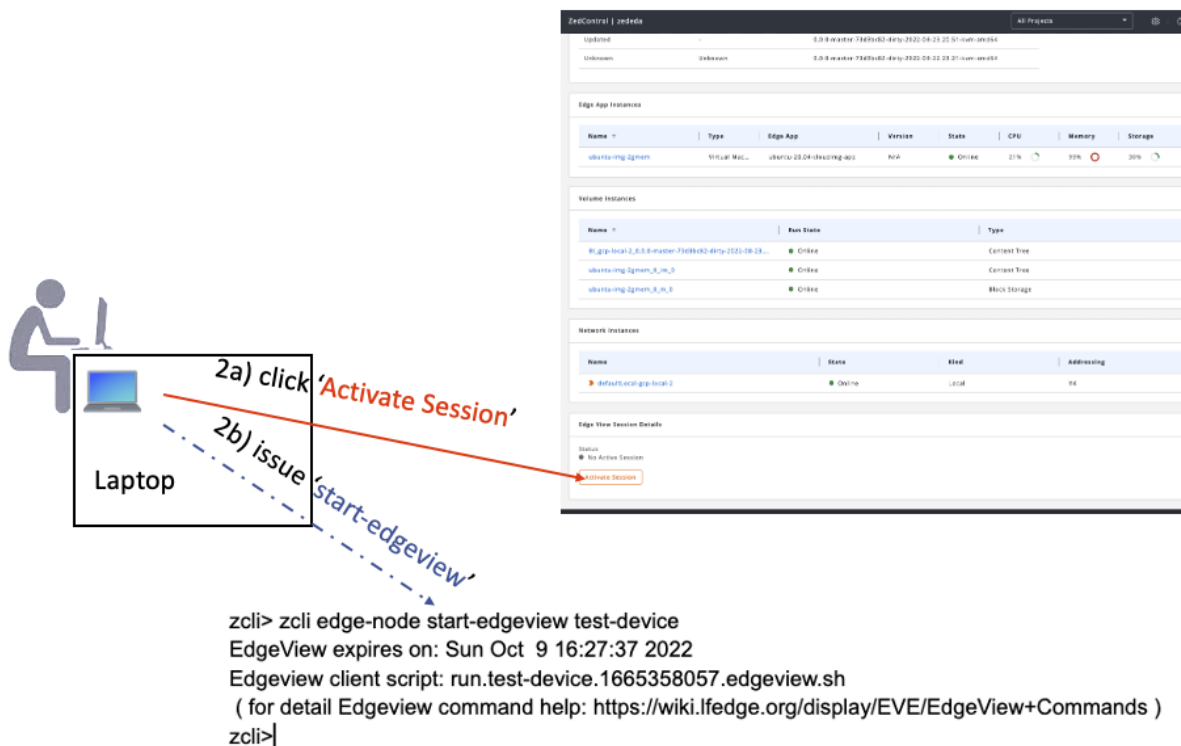

# Graphical Workflow of EdgeView

1) Go to Controller UI **or** using APIs

2) Start EdgeView for a Device

### 3) Download or Find Client Script

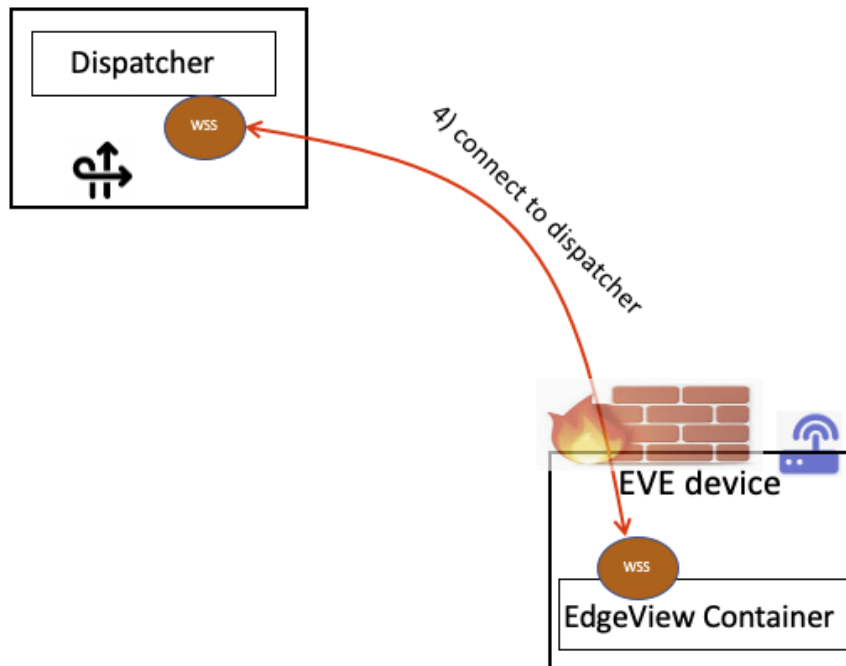

3a) download client script

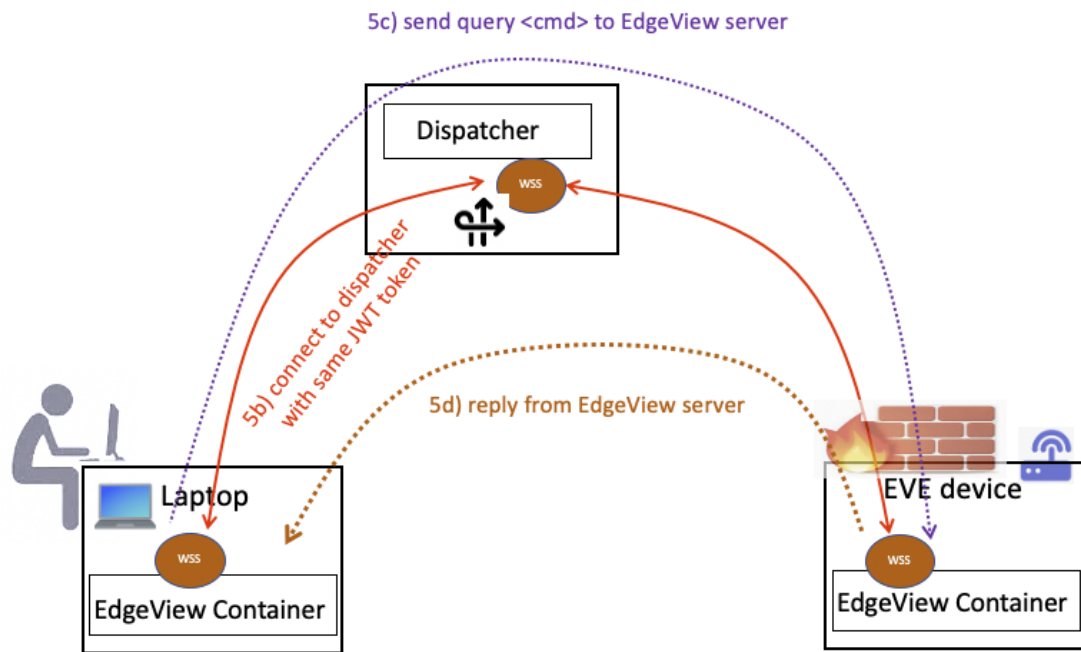

3b) script already generated

```
zcli> zcli edge-node start-edgeview test-device
EdgeView expires on: Sun Oct 9 16:27:37 2022
Edgeview client script: run.test-device.1665358057.edgeview.sh
( for detail Edgeview command help: https://wiki.lfedge.org/display/EVE/EdgeView+Commands )
zcli>
```

### 4) EdgeView on Device Connects to the Dispatcher (Session Active)

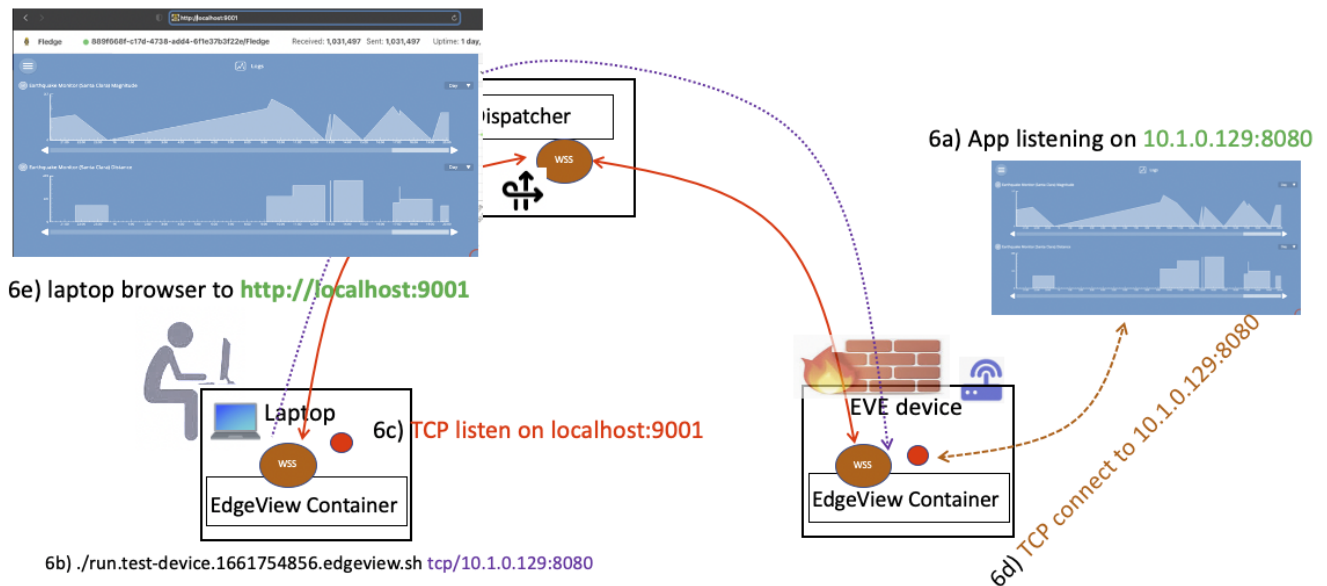

## 5) EdgeView Client on Laptop runs Commands

5a) `./run.test-device.1661754856.edgeview.sh <cmd>`

## 6) Browsing App Service through EdgeView TCP Channel

6b) `./run.test-device.1661754856.edgeview.sh tcp/10.1.0.129:8080`
