Meeting Time

- Agent Meetings are open to the public, and are held bi-weekly, starting July 27th 2020.
- Agent Working Group meetings are held every other Monday at 8:30am PT (find your local time [here](#))
- To subscribe to the meeting invitation, please visit [Community Meetings & Calendar: https://lists.lfedge.org/g/open-horizon-agent/calendar](https://lists.lfedge.org/g/open-horizon-agent/calendar)

■■■■

LF Edge Working Group 2 is inviting you to a scheduled Zoom meeting.

Topic: Open Horizon Agent WG Meeting

Time: Oct 5, 2020 08:30 AM Pacific Time (US and Canada)

Every 2 weeks on Mon, until Dec 11, 2023

Please download and import the following iCalendar (.ics) files to your calendar system.

Sub-groups

2023

AccuKnox has proposed an Isolation-centric workstream. A sub-group has been formed and meets Wednesdays at 12 noon ET/9am PT.

- Initial meeting 2023-07-26, recording: [35 minutes](#)
- Discussed options, capabilities, and eventually actionable goals. AccuKnox will create a Feature Candidate proposal containing our notes from the meeting.

Ideas:

1. If an attack is in progress or there is some other security policy violation, how should that information be surfaced from KubeArmor to Open Horizon? What should OH do about it? Should we extend the deployment policy to allow constraints to address and potentially terminate the agreement?
 2. How should OH/IEAM integrate with KubeArmor and Discovery Engine? DE includes thresholds and targets for notifications, as well as automated security policy generation.
 3. How do we address Day 1 deployment of KubeArmor? Only use their containerized version and deploy that way? Or extend our agent installation script to allow installing systems version of KubeArmor?
 4. How should OH facilitate KubeArmor control plane messaging through anax?
-

2022

AccuKnox presented a proposal to the TSC for a series of POCs solving security use cases. We've formed a 2022 sub-group to evaluate those.

POC Zero:

- Target environment is x86-based hosts, device agent
- Goal is to observe/audit Agent interactions, generate policy based on those interactions, and enforce the policy
- Services will be deployed during observation and enforcement but not observed

POC One:

- Target environment is x86-based hosts, device agent
- Goal is to observe/audit Docker-based applications and their interactions, generate policy based on those interactions, and enforce the policy

2022 Meeting:

- Feb 25: [Recording](#)
 - June 13: Slides, [Recording](#)
 - June 27: [Recording](#) (demo begins at 7:05 in the recording)
 - August 8: [Final demo of POCs zero and one](#) (demo begins at 1:12 in the recording)
