● JavaScript   ☆ 29   ⚖ CC-BY-4.0   ⑂ 52   ⊙ 26 (1 issue needs help)   ⥮ 1   Updated 9 minutes ago

- 11 PRs merged in the last two weeks, four fewer than last time
    - Six from Joe Pearson
    - Three from John Walicki
    - One each from Mukadas and Dependabot

## Discussion items

- Migrate "exchange-api" README to /docs and replace contents
- Working on cluster and cluster agent documentation
    - Single-node clusters vs multi-node clusters
    - On-host install vs remote install
    - Supporting new architectures (arm64, ppc64le)
    - Ensuring we have operator examples
        - Nginx working on the new architectures
        - Getting KubeArmor and Cilium example operators
        - Anything else?

- Populating the Exchange MMS with appropriate packages and configuration

# Action items

- [ ] Joe Pearson Broken tables on Exchange API docs page https://open-horizon.github.io/docs/exchange-api/README/
- [x] Joe Pearson Tie this ^^^ page to Swagger API (and other relevant pages)
- [ ] Joe Pearson What docs feedback mechanisms exist in LFX?
- [ ] Rene Cherny Are there any other documentation pages that need to be added here: https://github.com/orgs/open-horizon/projects/3
- [ ] Rene Cherny Take a look at the intro line for all of the cluster installation pages: Joe Pearson will open an issue
