

# Support

The LF Edge Sandbox is a free SaaS service provided by [sponsor] that interoperates with your edge hardware to make it easy to experience LF Edge projects and solutions. There is no implied support, and LF Edge has worked closely with ZEDEDA to provide this free resource to Linux Foundation community members. Help will be provided as best efforts by the community. Do not use the LF Edge Sandbox for commercial, production, or critical projects. Applications in the global marketplace are the responsibility of their projects/owners.

There are many resources to help our members with the LF Edge Sandbox.

- [Signup](#) - create a free account today
- [Slack](#) - Visit the LF Edge Slack community and post your question to the #lf-edge-sandbox channel.
- [Email](#) - post to our email distribution list at <https://lists.lfedge.org/g/lf-edge-sandbox>
- [ZEDEDA Help Website](#) - an online resource for answering questions about using and operating the LF Edge Sandbox.
- [Edge Academy \(registration required\)](#) - This education portal includes helpful tutorials and how-to guides for edge computing and the LF Edge Sandbox.

## Controlling Organization

The LF Edge Sandbox controlling organization is [the LF Edge TAC](#).

## Contact Information

For more information, please visit our [community slack channel \[#lf-edge-sandbox\]](#) or post to [our email distribution list](#).

### About the LF Edge Sandbox

The LF Edge Sandbox is a free SaaS service provided by ZEDEDA that interoperates with your edge hardware running project EVE. This service interacts with edge nodes running project EVE software. Once associated, you can deploy other LF Edge projects from the global marketplace combined with any application you upload to your private marketplace.
