OpenBao (Hashicorp Vault Fork effort) support

This page is intended to capture organizations and their main contacts that have made a statement of support for this effort and would potentially be community members of a standalone project. If you would like to be added to this list and are authorized by your organization to do so, please send a request and the information to post to Nathan Phelps and Joe Pearson or edit your organization's entry directly on this page.

Organization, project, or product	Statement of intended support	Contacts
EdgeX Foundry	EdgeX is looking support the effort ■ near term to maintain an open and Apache 2 equivalent replacement for Vault ■ long term - possibly to explore a lighter weight and more edge centric secret store Our secret store requirements are documented here: https://github.com/edgexfoundry/edgex-docs/pull/1222	• James Butcher, TSC Chair • Jim White • Lenny Goodell
IBM Edge Application Manager	• Will use Open Horizon, thus the containerized asset	• David Hudson, Product Manager
Open Horizon	• Will participating in forking • Will use the containerized asset	• Nathan Phelps, Mgmt Hub WG Chair • Joe Pearson, TSC Chair
NS1	• Plan to use the containerized asset	• Chris Graf
IOTech Systems	Our base edge platform (Edge Central) is based on EdgeX Foundry. We would use the new Vault fork in our products and look to the new project group to explore long term options.	• Jim White, CTO • James Butcher, Product Manager
ZEDEDA	• Plan to integrate with the asset to enable workloads to use the project.	• Erik Nordmark, CTO • Michael Maxey, VP of BD
Viaccess-Orca	• Will contribute resources • Will use deliverables	• Alain Nochimowski, CTO
WALLIX	• Will contribute resources • Will use deliverables	• Bryce Simon, Field CTO • Julien Cassignol, VP Global Business Strategy
