

Onboarding Key Instructions

This documentation provides a step-by-step process to assist you in managing your onboarding key securely.

Prerequisites

Before beginning, ensure you have:

- An LF Edge Sandbox [account](#). You can sign up for a free account [here](#).
- Your LF ID credentials (username and password). You can learn about creating an LF ID [here](#).

Step-by-Step Guide

Step 1: Navigate to the Wiki Page

- Navigate to the [Onboarding Key](https://wiki.lfedge.org/display/LE/Onboarding+Key) (<https://wiki.lfedge.org/display/LE/Onboarding+Key>)

Step 2: Log In Using Your LF ID

- Select the option to log in with your LF ID on the wiki's login page.
- Enter your LF ID username and password.

Step 3: Locate the onboarding key

- After logging in, navigate to the wiki section where the onboarding key is displayed.

Step 4: Make a Copy of the onboarding key

- Carefully copy your onboarding key. Ensure you do not alter any part of the token, as it is sensitive and must remain accurate.

Step 5: Save the onboarding key in a Safe Space

- Store the copied token in a secure location. This could be a password manager, a secure notes application, or any other secure method of storage you prefer.
- Please keep this token confidential and do not share it with others.

Step 5: Close the Webpage

- After securely storing your onboarding key, log out of the wiki page for security purposes.
- Close the browser tab or window where the wiki was open.

Important Security Tips

- **Keep Your Token Secure:** Treat your onboarding key like a password. It should be kept confidential and not shared.

About the LF Edge Sandbox

The LF Edge Sandbox is a free SaaS service provided by ZEVEDA that interoperates with your edge hardware running project EVE. This service interacts with edge nodes running project EVE software. Once associated, you can deploy other LF Edge projects from the global marketplace combined with any application you upload to your private marketplace.

Contact Information
